

WORKER SAFETY AWARENESS PROGRAM

MODULE SEVEN SUMMARY: PREVENTING WORKPLACE VIOLENCE

Module Seven: *Preventing Workplace Violence* provides basic information about how to identify and stop workplace violence injuries in adult family homes. Workplace Violence is the third most common cause of workplace injury claims in Washington's adult family home industry, injuring hundreds of workers every year. Many factors, including people with a history of violence, working alone, and lack of emergency communication systems can increase the risk of workplace violence. The Washington State Department of Labor & Industries requires adult family homes to have a written workplace violence prevention program because violence is considered a known high-risk hazard in the industry. Other recommendations for preventing workplace violence include developing standard reporting procedures, conducting a hazard assessment, establishing emergency communication systems, using a buddy system with risky individuals, ensuring adequate lighting, providing workplace violence training for staff, creating policies & procedures for recording & communicating past & current risky behaviors by residents, & developing contingency plans for emergency situations. A written accident prevention program, including how to identify and report workplace violence, plus a positive workplace safety culture that recognizes violence is not part of the job, help keep everyone safe.

Grant Project Goal:

The Adult Family Home Council (AFHC) believes that introducing a first-of-its-kind, industry specific, safety awareness training program will significantly reduce worker injuries in adult family homes.

Background:

The AFHC received a grant from the Safety and Health Investments Projects (SHIP) Program, Washington State Department of Labor & Industries for \$175,000 to develop training and education materials for a worker safety awareness program specific to the adult family home (AFH) industry. Claims data from the Washington State workers' compensation system shows that workers are getting hurt in the AFH industry. There were over 12,000 reported injury claims, including over 100 serious injuries, from 2012 through 2016 in the risk class that includes adult family home businesses. In order to help prevent future injuries, an AFH Worker Safety Awareness Review Committee has been established to oversee development, upkeep, and implementation of worker safety awareness training and education materials specific to the AFH industry.

Training Topics Included in this Module:

1. The impact of workplace violence in the adult family home industry
2. What is workplace violence?
3. Consequences of violence
4. Workplace violence hazards
5. Four types of workplace violence
6. Escalation Patterns
7. OSHA & Washington L&I requirements
8. Creating a violence prevention program
9. What to do if violence occurs
10. Workplace bullying
11. Aggression with Alzheimer's disease
12. Identifying workplace violence hazards in your adult family home

Training Module Objectives:

- Identify the impact of workplace violence in the adult family home industry
- Recognize different types of workplace violence
- Understand L&I and OSHA requirements & recommendations relating to workplace violence
- Recognize workplace violence hazards in your home
- Identify actions you can take to prevent workplace violence

Target Audience:

The target audience includes the owners and operators of the 2,900 adult family homes in Washington and their approximately 14,000 employees. By definition, adult family homes are small businesses located in residential homes, each with unique challenges. The AFHC is committed to supporting and helping adult family homes succeed.

Funding and support for this project has been provided by the State of Washington, Department of Labor & Industries, Safety & Health Investment Projects.

WORKER SAFETY AWARENESS PROGRAM

MODULE SEVEN CHECKLIST: PREVENTING WORKPLACE VIOLENCE

- Start with your written accident prevention program, required by the Washington State Department of Labor & Industries, which should address:
 - How to identify workplace violence hazards
 - How to report workplace violence
 - How to correct hazards before someone gets hurt
 - How to get help if violence occurs
 - How to evaluate & make improvements to your plan at least annually
- Develop, communicate, and enforce a no tolerance policy for workplace violence in your home, including a no weapons provision
- Target areas that you want to improve. Focus on processes & procedures that make sense for your home
- Provide safety awareness training related to workplace violence
- Create a positive safety culture that encourages the reporting of potential hazards and any incidents or violence or near misses
- Follow up quickly on any reports of violence or concerns about potential violence
- Ensure there is no retaliation for anyone who reports workplace violence incidents or concerns about possible violence
- Conduct a hazard recognition exercise with employees by walking through your adult family home to identify potential workplace violence hazards
- Use a job hazard analysis form to identify potential hazards and how to prevent or control them
- Develop a system for identifying risky past and current behaviors by residents and use this information to develop individualized care plans
- Provide a system for communicating during emergencies or calling for help when someone feels threatened (Consider cell phone or panic button use)
- Discuss workplace violence incidents or potential hazards at safety meetings
- Set up rooms so that clear escape paths are available.
- Control access to the home using locks and other security systems
- Ensure both indoor and outdoor areas are well lit
- Eliminate access to any potential weapons
- Identify cool down areas for residents or others to de-escalate & safe rooms for use in case of emergency

- Use specific log-in and log-out procedures for staff & guests
- Supervise the movement of residents & guests
- Develop procedures & contingency for what to do if a violent incident occurs. Include emergency contact information & processes for providing assistance to victims
- Use restraining orders when necessary & create a “restricted visitors” list for residents or guests with a history of violence
- Establish a liaison with local police & service providers (such as counselors) who can assist during & after a violent incident
- Cooperate with law enforcement, prosecutors, or other government agencies
- Request a [consultation](https://www.lni.wa.gov/safety-health/preventing-injuries-illnesses/request-consultation/) from the Washington State Department of Labor & Industries <https://www.lni.wa.gov/safety-health/preventing-injuries-illnesses/request-consultation/> or by calling 360-902-5554.
